

## DENTRIX POWERPAY™

Credit and debit card processing made easy

Dentrix PowerPay gives your practice the easiest and most efficient solution available for processing patient credit and debit card transactions. It's the only solution that integrates with your Dentrix software to create a streamlined, yet feature-rich, patient payment tool.

PowerPay saves you time. It eliminates double entry by automatically posting payments to the Dentrix Ledger. PowerPay also allows you to set up recurring and after-insurance payment consents that boost your bottom line and your front office productivity.

### PowerPay Features:

- Process credit and debit cards in Dentrix
- Setup recurring credit card consents
- Capture electronic signatures
- Accept payments through your eCentral website
- Provide patient financing options
- Receive free software updates
- Contact toll-free, live customer support

### Streamline your credit and debit card processing

When it's time to check out, PowerPay gives you a better way to process credit and debit card transactions. With one card swipe, PowerPay can process the charge and post the payment to the Dentrix Ledger automatically, eliminating double entry.

PowerPay also gives your patients the ability to pay with a debit card. PIN-based debit card transactions save your practice thousands of dollars in transaction fees. PowerPay is integrated with Ingenico® touch pads that also allow you to capture electronic signatures for payment authorization. Credit card information is automatically populated in Dentrix, for faster payment setup.

### Set up convenient and effective payment plans

When patients are unable to pay entire amounts, PowerPay gives you the ability to set up consents for future payments before patients leave your office. Payment consents can also be set up for after-insurance balances. PowerPay notifies you when it's time to process a payment. The recurring or after-insurance payments post automatically to the Dentrix Ledger. The simple process reduces your need for frustrating collection calls while improving your cash flow.

**Your Practice Will:**

- Reduce merchant rates by processing pin-based debit transactions
- Reduce accounts receivable balance with recurring and after-insurance payment consents
- Reduce collection calls by securing payment consents before the patient leaves the office
- Improve cash flow with the ability to collect payments on time
- Meet the latest Visa and Mastercard PCI data security standards
- Ensure use of the latest computer systems with Windows 7 64-bit compatibility

PowerPay’s payment consents make it easy to setup recurring and after-insurance credit card payment consents.

PowerPay is integrated with the Ingenico 6550 and 6580 (shown) devices to allow for PIN-based debit card transaction and electronic signature capture.

**Provide affordable patient financing**

Help patients get the treatment they need when they need it. PowerPay gives your patients access to the most affordable patient financing option available—the Citi® Health Card. Your patients can receive approval in minutes, allowing for more timely treatment plan completion. Plus, your practice will have lower merchant rates with the Citi Health Card than with other patient financing options.

You can process the Citi Health Card with Visa®/MasterCard® affiliation through your PowerPay terminal, eliminating the need for an additional terminal.

**Process credit and debit card transactions securely**

PowerPay is PCI-compliant and includes advanced administrative control, user accountability and fraud detection capabilities so you can rest assured that your credit card processing is secure.

**Take the Next Step**
