

eBackUp[®]

Secure, Automated, Online Data Backup

Your patient data may be the most valuable asset your practice owns. With eBackUp you can secure the safety of that asset easily. eBackUp is the only online backup solution that is simple, reliable, secure and recommended by the developer of your practice management software. eBackUp allows you to restore your data to any computer with an Internet connection. Day or night, your data is never more than a few mouse clicks away.

Easy and Reliable

Backing up your data online eliminates the risks of tape or CD drive failure, human error, or improper storage of backup media. Plus, eBackUp automates the backup process and performs scheduled backups as you direct. You control which files you want to backup and how often—eBackUp does the rest. eBackUp even keeps you informed of the status of your backup data with backup logs. You'll know exactly which files backed up successfully and which still need attention.

eBackUp

eBackUp Versus Manual Backup

Most manual backup processes can leave your data vulnerable to hazards like fire, natural disasters, power surges and theft. eBackUp encrypts your data and secures it in multiple, remote locations for a level of security that cannot be achieved otherwise. Plus, the Health Insurance Portability and Accountability Act (HIPAA) requires dentists and other health care professionals to use a backup procedure that protects patient data in accordance with HIPAA security standards. Doctors who use eBackUp can be confident their data is backed up and protected in accordance with all HIPAA mandates. eBackUp's compression technology even reduces the size of your backed up data up to 99% to save you money.

The eBackUp Difference

- FastBIT™ data compression technology
- HIPAA-compliant
- Unparalleled user control
- Easy-to-use "smart select" interface
- Reliable automated process
- Space saving data compression
- Free instant software updates
- Toll-free, live customer support
- No annual contracts
- Preferred pricing for customers on a current support plan*

What a lifesaver! We have had several computers "crash," including our server. It was great to be able to rely on the backups to be restored quickly and correctly.

– Jennifer St. Cyr, Patient Coordinator
