

Viewing Questionnaires

When new questionnaire notifications are received, eSync makes it easy to access the Questionnaires module and view the new questionnaires.

eSync automatically notifies you in real-time when patients submit questionnaires. eSync notifications appear above the system tray. Each notification remains visible until the notification is closed or the notification link is clicked.

If you receive additional questionnaires while a notification is displayed, the notification updates to reflect the additional questionnaires.

Pre-requisites

Before you can use eSync to view new questionnaires, you must complete the following:

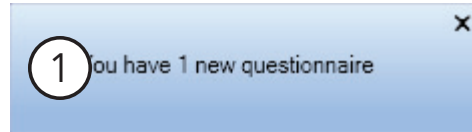

- Setup the Questionnaires features.

Note: See the eSync User's Guide for details about setting up eSync features.

Viewing Questionnaires

To view new questionnaires:

- 1 Click the questionnaires notification to open the Questionnaires module.

- 2 View questionnaires as usual (see the DENTRIX User's Guide for details about how to view new questionnaires)
