

Integrated Credit and Debit Card Processing

PowerPay is the easiest and most efficient solution to process credit and debit cards from within your practice management software. With one card swipe, PowerPay can authorize a charge and post the payment directly to your ledger—eliminating double entry. Using PowerPay reduces accounting errors while increasing practice profitability.

Reduce Your Accounts Receivable

Save time and better manage your accounts receivable with PowerPay by setting up automatic recurring or 'after-insurance' payments in the Consent Manager. Simply swipe or key in the patient's credit card number, enter the details of the payment plan, click OK and you're done. The payment plan is scheduled and PowerPay will handle the rest. You'll avoid countless hours in frustrating collection calls, while increasing staff efficiency.

Increase the Bottom Line

PowerPay, combined with the Ingenico Touch Pad, can process debit cards to save your practice thousands of dollars in merchant fees. On average, debit card fees are less than half those associated with processing credit cards. The Touch Pad will allow you to capture electronic signatures for payment or treatment consent and go paperless!

PowerPay

Get More Out of PowerPay

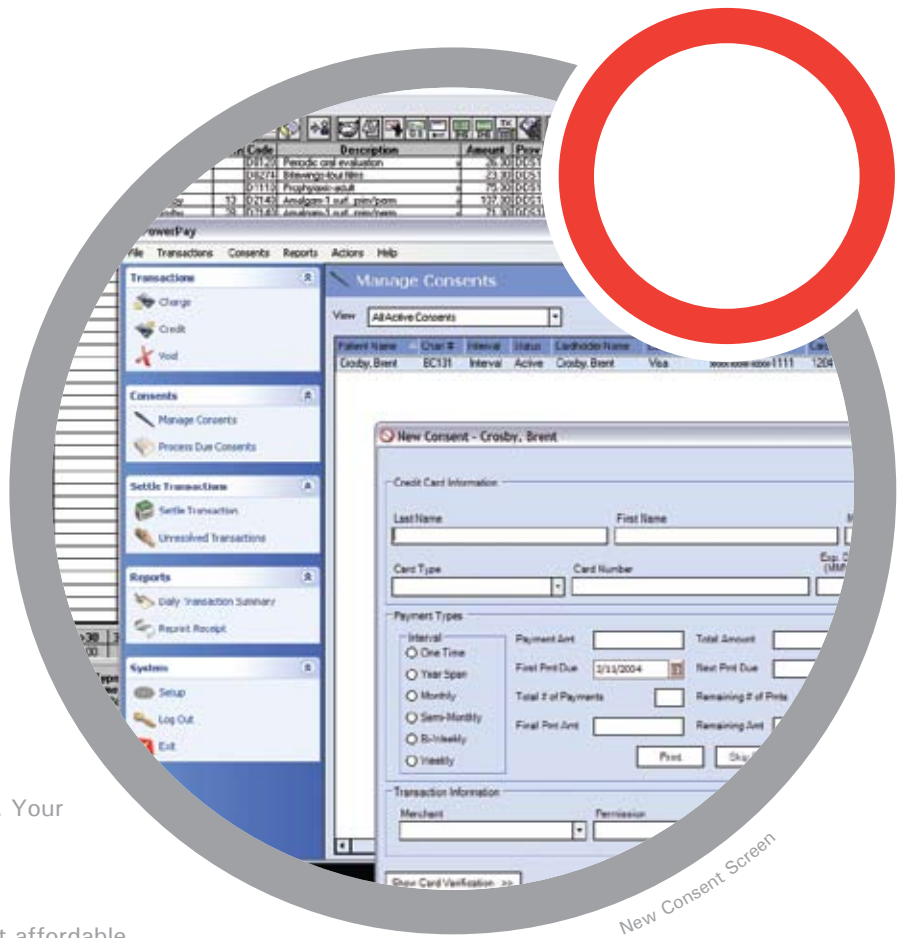

In addition to the Ingenico Touch Pad, PowerPay is compatible with the Interlink ePad and the Samsung Thermal Printer. The ePad allows you to capture and store electronic signatures for payment or treatment consent. The thermal printer can quickly print a credit card transaction receipt, with the option to print a second copy for your office. When used in conjunction with the ePad or touch pad, the thermal receipt printer allows you to capture and print your patient's signature on the receipt. You can even personalize the receipt with your practice's name and address.

Take Payments Online

PowerPay makes online payments a reality.* Once you have PowerPay, setting up online payments is fast and simple. Virtually overnight your Web site can become an important tool for your patients and a crucial part of your accounts receivable management. Your patients will appreciate the convenience.

Affordable Patient Financing

PowerPay also gives your practice access to the most affordable patient financing vehicle available—the Citi® Health Card. Your practice will have lower merchant rates and your patients will have more affordable options that allow more timely procedures. Plus, the Citi Health Card can be processed with your PowerPay terminal—no stand-alone terminal is required.

The PowerPay Difference

- Integrated credit card solution
- Credit and debit card processing
- Automatic payment entry
- Electronic signature capture ability
- Competitive merchant rates
- No point-of-sale terminal fee
- Advanced fraud detection capability
- Online payment functionality
- Patient financing processing
- Free software updates
- Toll-free, live customer support

Compatibility

- DENTRIX®
- DENTRIX® Enterprise
- Easy Dental®

“My favorite feature in DENTRIX is PowerPay. It automatically integrates into the DENTRIX ledger and is very easy to use.”

—Debbie Keunzel, Office Manager
Aesthetic Periodontology
Auburn Hills, MI
